

Official press release

Steam Train Festival 4 & 5 may 2019

Update! 29.013 secured for Steam Festival 2019

Date press release: 27 February 2019

Press contact: Kevin Hoggett (avonside040@telenet.be)

Press kit: not available yet

In addition to our previous press release, we have an update concerning the Steam Train Festival held at Maldegem, Belgium.

After some negotiation, Belgian Railways have agreed to allow their Canadian built 2-8-0 29.013 to attend Maldegem Festival and to work trains.

This is the locos first public appearance for four years. She has recently been fitted with modern safety systems required for the mainline, but since these are not yet certified, she is unable to run mainline without a pilot loco.

The festival, and also a WW2 themed event at Maldegem two weeks later, will be used for crew training.

With kind regards,

Kevin Hoggett
